Regulatory Issues – Key Aspects (1)

Mobile termination rates: The Austrian administrative court rescinded the last two SMP-decisions because the National Regulatory Authority imposed an ex-ante obligation on mobile operators retroactively which is illegal in the court's view. With this revocation the glide path of mobile termination rates was rescinded as well. The national regulatory authority resumed the proceedings, which were affected by the court's decision. The new decision is expected by the end of H1/2009.

Next Generation Networks: The Commission will publish its final recommendation on next generation access. The main issues addressed in the recommendation include access to basic facilities including ducts as well as geographical segmentation. The recommendation interprets the current framework and has in its draft partly contradicted the terms adopted by the European Parliament adopted in its first reading for the next legal framework on the subject of investments (e.g.: risk-sharing agreements, proportionality of remedies). At national level, especially access issues remain under discussion.

Regulatory Issues – Key Aspects (2)

Review of the Regulatory Electronic Communication Framework: The new regulatory framework is now under discussion in a triologue between the European Parliament, the Council and the Commission, with the goal of reaching an agreement by mid-March 2009 at the latest in order to facilitate adoption in a second reading of the European Parliament. Reopened issues are, among others, the scope of functional separation (fixed only or undefined), NGA, net neutrality provisions, mobile number portability, spectrum management and the creation of a European Electronic Communications Authority.

Unbundling of the Local Loop: In a decision end of October 2008 the National Regulatory Authority mandated Telekom Austria to retroactive lower its monthly ULL charges from EUR 10.44 to EUR 9.33 due to the “KombiPaket” offer for the period from Nov.07 to Jan.08.

Regulatory Issues – Key Aspects (3)

International roaming charges: As of end of September 2008 the EU-Commission filed its draft proposal to the EU Parliament and the Council to extend the existing roaming regulation. The proposal calls for:

- Extension of the voice roaming regulation at both wholesale and retail level until 2012.
- Per-second billing both at wholesale and retail level, except for 30/1 pulsing for outgoing calls at retail level.
- Wholesale and retail price caps for SMS. Wholesale cap at 4 Cents, retail cap at 11 Cents.
- Introduction of transparency measures for data roaming: By July 1, 2010 customers should be allowed to specify a “cut-off limit” for their outstanding data roaming charges.
- Introduction of a wholesale price cap for data roaming services of 1 Euro starting from July 1, 2009.
