Telekom Austria Group Strategy - Overview

Leverage added-value in its core business

Convergence & inmarket consolidation

i.e. Content & Media Data & ICT Cloud Services

Evaluate opportunities of value accretive acquisitions

Operational Excellence

Cash-use policy - Focus remains on maintaining Baa2/BBB ratings

Conservative financial strategy is the framework for investments

> Ratings Baa2 from Moody's and BBB from Standard & Poor's strengthen financial flexibility

A

Fibre rollout in Austria

- > Investments of EUR 400 mn in 2015-2018
- > Target: Bandwidths of 30 Mbps for more than 70% of the population

В

Flexibility for M&A activity

- In-market consolidation and convergence
- > Expansion of the existing footprint

Operational and financial highlights for the full year 2014

FY 2014: Group turnaround gains momentum and reflects effectiveness of strategic measures taken

- >Structural revenue improvements and stabilisation of EBITDA comparable underline success of turnaround strategy
 - >Sequential revenue improvements throughout 2014 result in EUR 4.0 bn Group revenues (-4.0% y-o-y)
 - >Stable Group EBITDA comparable and strong margin growth primarily due to Austria and Belarus
- >Group OPEX cut by EUR 163 mn (clean of EUR 30.1 mn one-off effects* in Austria in Q4 2014) mostly via significant subsidy reduction and lower termination rates in Austria
- >1.4% EBITDA comparable growth in Austria due to lower costs and ARPU growth

^{*} This effect was the result of a European Court of Justice decision from 11 November 2014, which ruled that the legal framework for the years of service and, consequently, the term to promotion for Austrian civil servants was not in line with Union law.

FY 2014: Group turnaround gains momentum and reflects effectiveness of strategic measures taken

- >Operating results in Belarus outpace FX deterioration in 2014, but approx. 25% devaluation in January 2015 already equivalent to full year business plan assumptions
- Slowing revenue declines in Bulgaria; Croatia and Additional Markets impacted by regulation
- Impairment in Bulgaria and higher restructuring costs in Austria result in net loss; retrospective impairment adjustment affects net results for 2013
- Convergence strategy extended to Republic of Macedonia
- >Group outlook for FY 2015: Revenues approx. +2.0%, CAPEX* of EUR 700 750 mn, intended dividend of EUR 0.05/share**

^{*} Does not include investments for spectrum and acquisitions

Key financial developments in the fourth quarter 2014

Q4 2014: Improved revenue trends, strong EBITDA comparable growth in Austria

| (in EUR million) | Q4 2014 | Q4 2013 | % change |
|---|-----------------------|----------------|--------------|
| Revenues | 1,030.3 | 1,055.7 | -2.4% |
| EBITDA comparable* EBITDA comparable margin* | 252.1 <i>24.5%</i> | 262.3 24.8% | -3.9% |
| Restructuring Impairment | - 77.5 -5.1 | -9.9 -59.4 | n.m. n.m. |
| Depreciation & amortisation | -209.3 | -219.5 | n.m. |

| Income tax gain/expense | 34.8 | -29.6 | n.m. |
| Net income / Net loss | -48.9 | -107.1 | n.m. |

- > Revenue decline slows to 2.4% driven by better trends in Austria while FX impacts revenues in Belarus
- > Austria returns to EBITDA comparable growth; Group decline primarily due to Croatia
- > OePR** audit results in retrospective adjustment of impairment for Bulgaria booked in Q2 2014: EUR 340.6 mn in 2014, EUR 59.4 mn in 2013
- Impairment of EUR 5.1 mn in Rep. of Macedonia due to a change in WACC
- Income tax gain of EUR 34.8 mn due to deferred tax gains

^{*} Excluding effects from restructuring and impairment tests

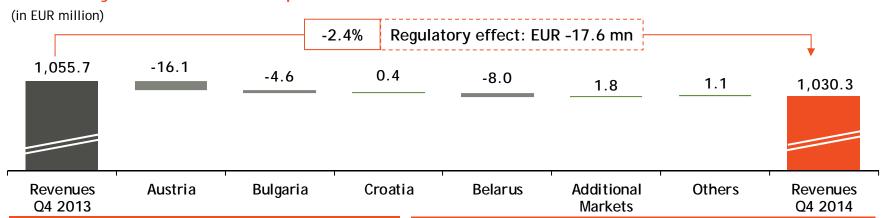

Österreichische Prüfstelle für Rechnungslegung ; Austrian Financial Reporting Enforcement Authority

Restructuring in Austria: FTE reduction on track; interest rate and one-off effect increase charge

| | EUR mn | Comments |
|---|--------|---|
| FTE reduction | -45.9 | Transfer to government: 21 FTEs; Social plans: 127 FTEs |
| Interest rate adjustment | -42.6 | Lower interest rates require additional contribution to restructuring provision (NPV of future payments) |
| Provision for additional payments to civil servants | -15.0 | One-off effect: EU ruling requires payments to civil servants (see one-off effect in employee expenses) |
| Servicekom contribution | +26.0 | Staff released from work re-introduced to workforce; e.g. 219 FTEs temporarily assigned to work such as dismantling obsolete infrastructure, etc. |
| Total restructuring charge | -77.5 | Reflected in P&L |

Significant slowdown in revenue decline

Quarterly revenue development

Segment Austria

- > Revenue decline slows to 2.4% versus 7.6% in Q4 2013
- > ARPU grows by 5.2% to EUR 16.5 predominantly driven by a higher premium share in the subscriber base
- Mobile net adds slows to -23,800 as lower churn mitigates lower gross adds
- > ARPL falls by 2.5% to EUR 30.5 due to the ongoing decline of voice revenues
- > 11,600 fixed-line net adds since Q3 driven by strong fixed-line broadband and IPTV sales

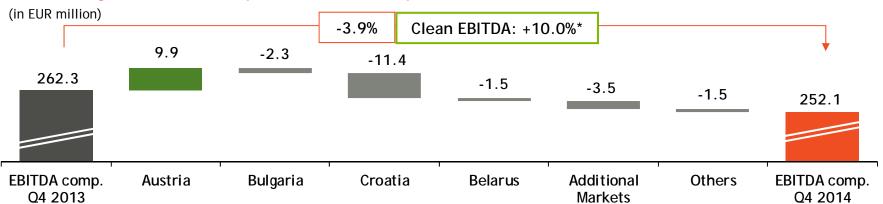

International Segments

- Bulgaria: Lower monthly fee and traffic revenues due to price pressure in the business segment as well as the loss of mobile voice customers
- > Croatia: Lower interconnection and roaming revenues more than offset by higher equipment sales and mobile fixed fees
- Belarus: Strong operational growth due to inflation-linked price increases and upselling effects from smartphone demand; decline due to negative FX effect of EUR 11.9 mn
- Additional markets: Higher revenues in the Republic of Serbia and acquisition of blizoo Macedonia drive growth

EBITDA comparable growth in Austria offset by higher costs in Croatia

Quarterly EBITDA comparable development

Segment Austria

- > EBITDA comparable grows 6.9% y-o-y
- > Negative one-off effects: EUR 11.0 mn in Q4 2013 and EUR 30.1 mn in Q4 2014
- > 18.7% EBITDA comparable growth y-o-y excluding one-off effects
- > OPEX cut by 8.9% or EUR 47.7 mn (clean off one-off effects)
- > 30.5% lower material expenses driven by 76.9% cut in SACs and 36.9% cut in SRCs

International Segments

- Bulgaria: 5.8% lower operating expenses almost offset decline in revenues; lower EBITDA comparable
- Croatia: Operating expenses rise by 21.0% due to the higher frequency usage fees as well as higher costs for bad debts and personnel restructuring
- > Belarus: Operating expenses increase by 11.3% on a local currency basis driven by inflation-based salary and FTE growth as well as higher other operating costs
- Additional markets: 2.6% higher operating expenses due to higher material expenses across segments

Excluding FX effects and EUR 30.1 mn one-off effect in Austria

Positive free cash flow in 2014 due to lower CAPEX

| (in EUR million) | Q4 2014 | Q4 2013 | % change | FY 2014 | FY 2013 | % change |
|------------------------------------|---------|----------|----------|---------|----------|----------|
| Gross cash flow | 273.8 | 227.7 | 20.2% | 1,190.4 | 1,137.2 | 4.7% |
| Change in working capital | -46.4 | 34.3 | n.m. | -289.0 | -85.7 | n.m. |
| Cashflow from operating activities | 227.4 | 262.0 | -13.2% | 901.4 | 1,051.6 | -14.3% |
| Ordinary capital expenditures | -284.9 | -1,286.1 | n.m. | -757.4 | -1,779.1 | n.m. |
| Proceeds from sale of equipment | 3.4 | 3.7 | -6.8% | 12.1 | 10.8 | 12.7% |
| Free cash flow | -54.1 | -1,020.4 | n.m. | 156.1 | -716.7 | n.m. |

Year-to-date analysis

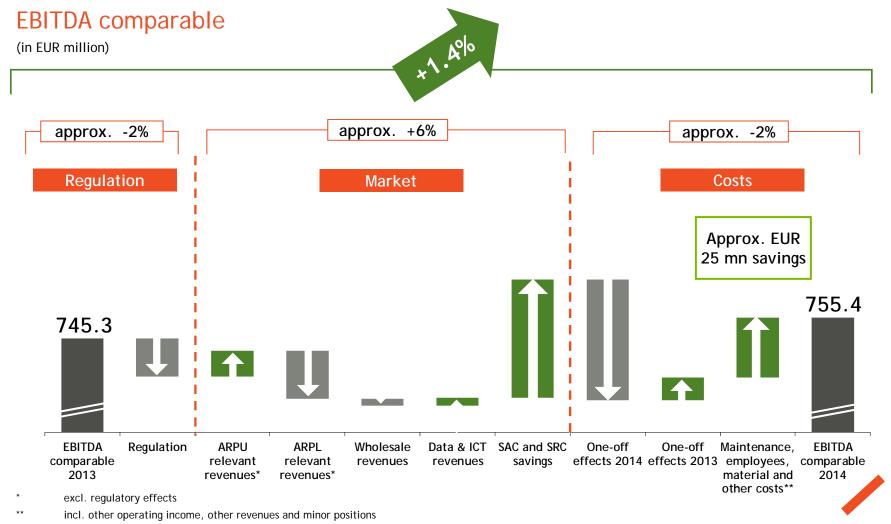

- > Increase in gross cash flow reflects strong operational trends
- > Increase in working capital due to a rise in installment sales, the utilisation of restructuring provisions and a decline in liabilities
- > High CAPEX in 2013 driven by the acquisition of mobile frequencies and intellectual property rights, frequencies and collocation rights for base stations from Orange Austria as well as spectrum costs in Austria (EUR 1.03 bn), Croatia, Slovenia and the Republic of Macedonia (EUR 37.8 mn for international markets in total)
- > Increase in free cash flow to EUR 156.1 mn

^{*} The reduction in accounts receivable visible in the balance sheet is primarily the result of the changes to revenue accounting estimates in Austria.

Focus points

Austria: SAC and SRC as well as structural cost offset negative one-off effects in 2014

Spillover of Russian devaluation weakens Belarus' real performance despite operational hedges

| Devaluation | 2014 | 2015ytd |
|-------------|-------|---------|
| EUR - BYR | 9.0% | 16.6% |
| EUR - RUB | 35.5% | 8.4% |

| | 2014 | 2015e |
|---------------|-------|--------|
| BLR inflation | 16.2% | 20.0%* |

- Successful operational hedges against gradual FX deterioration
 - Approx. 18% price increase in 2014 in line with inflation
 - > FX exposure of OPEX reduced to approx. 45%
 - > FX-indexed revenues increased to approx. 18%
 - > FX-denominated CAPEX maintained at approx. 80%

Response to 25% devaluation in Dec 2014 - Jan 2015:

- > Maintaining minimum BYR balance
 - Immediate payment and pre-payment of FX-denominated BYR liabilities, e.g. frequency fees, taxes, rentals
 - Immediate stop of handset installment offers. Reassessment of CAPEX plans
- Sharing of BYR risk with suppliers to the extent possible
- > 11% price increase + volume stimulus in early December provides certain buffer for H1 2015
- Supply of terminals and auxiliary infrastructure from Russia

FY EUR-BYR development uncertain:

> BYR dynamics is highly correlated with RUB (> 50% of exports to Russia) and therefore driven by oil-price and geopolitical factors

^{*} Governmental Target of 31.01.15 (supported by tight money-supply and harsh price-controls): 18%-20%

Update on Digital Single Market (DSM): Potential delays may push back further regulatory downside

Overview discussion points of Council of EU:

DSM topics currently on agenda

- > Net neutrality
- > Roam-like-at-home (new proposal vs. EU Parliament proposal)
 - Basic allowance with domestic tariffs (scope undefined) plus wholesale caps

DSM topics currently dropped from agenda

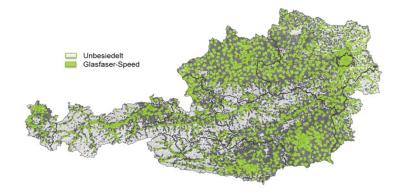

- > Intra-EU calls
- > Access enabling/spectrum rules
- > Single EU authorisation
- > End-user protection

Earliest possible date of final agreement: Winter 2015 - only realistic if in March 2015 compromise agreement in Council of EU is reached

Core business: Broadband rollout in Austria

- ✓ 2014 more than 70% households were reached with A1 Fiber Power 16!
- Goal 2015:
 Increase the product coverage
 A1 Fibre Power 30 from 28% to
 more than 37% homes passed

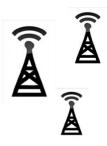

Approx. EUR 400 mn from capital increase to be invested between 2015 - 2018
 → Precondition: Announced broadband subsidy

- > Cable consolidation in Macedonia
- > Cable rollout in Croatia & Bulgaria

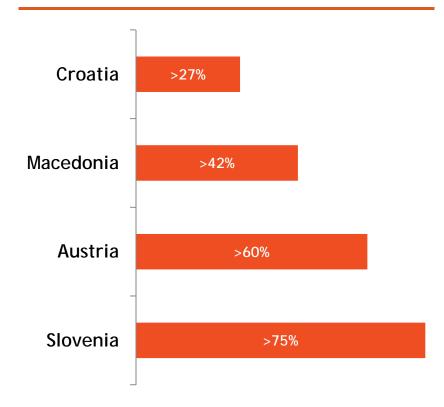

Accelerating LTE rollout across the Group

LTE population coverage YE 2014

LTE rollout strategy 2015

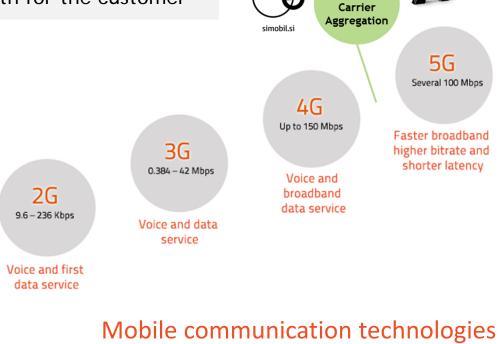

- A1 and Si.mobil will offer LTE nearly nation-wide
- Vip operator will reach more than half of the population with its LTE network
- Vipnet will expand the LTE coverage for the biggest cities and the Croatian coastline
- Vip mobile will start the LTE rollout after the frequency auction

A1 and Si.mobil started next stage of LTE network rollout with carrier aggregation

> Duplicates the available bandwidth for the customer

- Carrier aggregation based on existing LTE networks
- ✓ A1 has presented LTE carrier aggregation for the first time in the world based on two 20-MHz frequency blocks from the 800 and 2600-MHz frequency bands
- Si.mobil is going to selected locations across six cities in Slovenia with LTE carrier aggregation
